Contents of Volume 31

No. 1. *January 1951*

Physiology of Fertilization in Mammals	*M. C. Chang and G. Pincus*	1
Secretory Function of Male Accessory Organs of Reproduction in Mammals	*Thaddeus Mann and Cecilia Lutwak-Mann*	27
Biological Mechanisms of Carboxylation and Decarboxylation	*Severo Ochoa*	56

No. 2. *April 1951*

Intravascular Agglutination of the Formed Elements of Blood	*Brenton R. Lutz*	107
Mucoproteins in Relation to Virus Action	*F. M. Burnet*	131
Fact and Theory Regarding the Calorigenic Action of Adrenaline	*Fred R. Griffith, Jr.*	151
The Hepatic Artery	*J. Markowitz and A. M. Rappaport*	188

No. 3. *July 1951*

Mechanism of Action of the Thyroid Hormone	*S. B. Barker*	205
Determinants of Uterine Growth and Activity	*S. R. M. Reynolds*	244
Some Physiological Aspects of Ageing	*A. I. Lansing*	274
Sodium, Potassium and Chloride Alterations in Disease	*Richard R. Overman*	285
Specificity, Mode of Action and Distribution of Cholinesterases	*V. P. Whittaker*	312

No. 4. *October 1951*

Metabolism of the Hemin Chromoproteins	*David L. Drabkin*	345
Micromethods and Their Application in the Study of Enzyme Distribution in Tissues and Cells	*H. Holter and K. Linderstrøm-Lang*	432
Carbohydrate and Fat as Factors in Protein Utilization and Metabolism	*H. N. Munro*	449
Structure and Physiological Functions of Ferritin	*S. Granick*	489
